

Fig. 4 Offline evidence-pack verification — the honest verdict grid

openmiura verify distinguishes untampered-but-unbound, bound, foreign-key and tampered

input	verdict	exit
no trust anchor	VERIFIED consistent, signer not asserted	0
--trust-anchor (real signer)	VERIFIED authoritative — signer confirmed	0
--trust-anchor (foreign key)	NON-AUTHORITATIVE signed, but not by a trusted key	2
tampered pack	FAILED package_integrity_valid = false	1
